PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

Follows Her Nose.

A bow rudder is a unique feature in the equipment of the Princess Norah, latest addition to the fleet of the British Columbia Coastal Steamship of the Canadian Pacific Railway. This facilitates the control of the vessel in the narrow channels in Pacific coastal waters and between Vancouver Island and the mainland linking the ports of Vancouver, Victoria, and Seattle.

The Princess is shown here in dry-dock, her bow rudder being plainly visible. On her initial voyage up the coast she carried a distinguished company, including The Honourable the Governor General and Lady Willingdon, Hon. Randolph Bruce, Lieutenant Governor of British Columbia, and his niece Miss Helen Mackenzie, an prominent residents of the Pacific coast.

Ball Tournament June 3

Posters for Oyen's second annual "baseball" tournament will be out this week. Ball clubs intending to play, should have their entries in the hands of the secretary, Mr. J. R. Acheson, not later than 8 p.m. on Saturday, June 3, and the first game in the tournament will commence at 1 p.m. Prizes are offered as follows: \$25.00 for each win up to final game, and \$50.00 for the winner of final.

The Oyen ball club, has during the past few seasons, made an excellent showing and provided good entertainment for the fans. Following the same policy adopted in previous seasons, it is the intention of the club to be self supporting, meeting their expenses with gate receipts and prize money they may win.

Be in Oyen on Monday, June 3, and give the boys your support.

District Gets Nice Rain

Following a week of fine cool weather, with light frosts in the early mornings, the temperature rose last Sunday, and remained warm and sunny until evening when a strong north wind commenced, accompanied by a few lightning flashes and thunder. About nine o'clock a light shower of brief duration occurred, and for a while the weather looked like clearing, but shortly after 1 a.m. on Monday morning, a light drizzle commenced and continued with varying intensity throughout the day. The rain gauge readings at 8 a.m., 12 noon and 5 p.m., respectively, were: .16 inch, .16 inch and .28 inch, totalling .60 inch. At 11 p.m. on Monday snow started to fall and continued till about 3.30 p.m. Tuesday when the rain gauge showed another .32 inch of moisture, bringing the total to .91 inch. With the seeding of wheat practically completed under ideal conditions this years crop is now given a very favorable start.

M. D. of Cereal

The council of the Municipal District of Cereal No. 242, met to the municipal office at Oyen, Alberta on Saturday, May 11, at 10.00 a.m.

All councillors present.

The minutes of the council meeting of April 13 and the financial statements for the month of April were read and approved.

Correspondence presented and dealt with.

The schedule of Public Works recommended by councillors T. O. Stephenson, J. E. Werry, C. O. Olson, J. Gripp and F. W. Nichol were approved.

The council decided to engage B. F. Mitchell to do any surveying required in 1929.

The Secretary was instructed to communicate with the Soldier Settlement Board in regard to a road diversion through the S.W. 10-27-1.

The council gave their approval to lease agreements with Mary Inez Hillman and C. A. Bishop covering the S.E. 21-27-5-4 and the S.E. 18-28-4-4, respectively.

The council authorized the Secoray-Treasurer to levy the following mill rate for school purposes in the following districts: Superior, 0; Hills, 17; Superba, 8; Abbott, 7; Nebalta, 5; Greenmound, 15; Kenmaul, 14; Springburn, 15; Kirkwall, 13; Fairweather, 8; Farming Valley, 10; North Excel, 16; Clarkson, 16; Lunberg, 10; Stinson, 12; Neilville, 0; Feudville, 7; Bell Blains, 0; Webster, 0; Keswick, 9.

The Secretary was appointed appraiser for those parcels of land to be sold June 8, under the Tax Recovery Act.

The school payments made by the Reeve and Secretary were approved.

The council decided to accept the proposal of the Soldier Settlement Board to accept a 5 per cent straight interest on arrears of taxes in lieu of the 5 per cent penalty each six months.

J. P. Horabek was appointed assessor for 1929 at a salary

The Power Of Small Things

The following item was recently printed in a large number of newspapers.

Forty-five years ago there was a strike in an Ohio coal mine. A group of enraged miners took a car of coal, set it afire, and pushed it into the mine. That fire is still burning under ground, spreading many miles, destroying valuable coal deposits and rendering hundreds of acres of surface ground sterile. Today it threatens to destroy a school building and some homes in a village. Burning beneath them it is undermining the ground and may cause them to collapse. The fire that a moment's anger started 45 years ago certainly turned out to be a bigger thing than the men who started it ever imagined.

There is a moral to this incident which might well be heeded, for, after all, it is but an illustration, a spectacular one, it is true, of almost every day happenings. The moral is that a small act may have far-reaching consequences, either good or evil.

A cow kicked over a lamp in a barn in Chicago, and the Great Chicago Fire resulted.

A frenzied student assassinated an Austrian Grand Duke and his wife, and the Great War was the immediate outcome with its sacrifice of ten millions of lives and hundreds of billions of dollars in property and other losses.

An employee in dismissed in anger, and perhaps unjustly, and a nationwide strike followed, bringing suffering and ruin in its wake.

A careless workman, or a dishonest contractor, neglects to put a sufficient quantity of cement in the foundations of a building or in the piers for a bridge, or the retaining wall of a dam, and disaster follows taking heavy toll in human lives.

A rotten timber is used in building a ship, and the vessel sinks; a faulty rail is laid in a track, and a train is wrecked; a careless carman neglects to put his fire, and a terrible crash occurs.

And how often has a hasty word, an insulting remark, led to family and business estrangements with dire results to all concerned.

How often, too, has the peace and friendliness of an entire community been destroyed because of the misapprehension, the unguarded reflection upon the honor and integrity of another, the prejudiced utterance casting aspersions upon those of different race or religious beliefs.

All little things in comparison to their terrible effects and disastrous results!

Fortunately, for the human family, the reverse is also true.

We still recall our childhood's interest in the story of the little Dutch boy who by sticking his finger in the small hole in a dam saved his country from inundation. We delight in the personal histories of great men and women who were started on their careers by the kindly, encouraging word of some friend.

We know, too, by personal observation that the mighty oak is born of the humble acorn; that it was in a single kernel of wheat the hundreds of millions of bushels of Marquis wheat annually harvested in Western Canada had their origin.

If we would but remember and give heed to the fact that, just as a pebble thrown in the water causes ever widening circles of little waves to sweep its surface until finally they lose themselves upon the shore, so does every word and act of ours create little circles of influence radiating out into our homes, our offices, our communities and the world at large, and, for good or ill, affecting the lives and future of others and of our country, then, perchance, we would be more careful, more considerate, a little less haughty and impatient of others, and more inclined to extend that degree of sympathy and tolerance to others which we naturally expect will be displayed towards us.

Local Option In India

Voters In Town Of Taran Went "Dry" To A Man

An astonishing thing has happened in the Punjab. Citizens of the town of Taran have lately secured from the Provincial Government the privilege of holding a local option election as to whether liquor shops in the town should continue to operate. Over fifteen hundred voters went to the polls and voted "dry" to a man. This is probably the most decisive local option vote yet recorded in any country. The nearest approach to it possibly occurred in Kentucky some twenty years ago when about the same number of voters were cast, and all were "dry" except those of the two liquor

"A GREAT TONIC," SAYS MRS. RUSSELL

After Taking Lydia E. Pinkham's Vegetable Compound

Windsor, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound during the change from winter to spring, and for nervous feelings, loss of appetite and to gain strength. It is a great tonic. I have taken a dozen bottles of it. It was recommended to me by a friend and now I recommend it to all women for such troubles as come at this time."

—Mrs. W. V. Russell, R. No. 6, Windsor, Ont.

dealers and their relatives—seventeen in all.

Worms are encouraged by morbid conditions of the stomach and bowels. Lydia E. Pinkham's Vegetable Compound will alter these conditions and drive the worms away. No destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution.

Encouraging Business Outlook

Volume Of Business At A High Level For First Three Months Of Year. Business activity generally in Canada during the first three months of this year was greater than any similar period since the war, according to an official review of the current business situation in the Dominion.

The dollar volume of business, as indicated by bank debits at the clearing house centres, was at a higher level during the first quarter of 1929 than at any similar previous period, since the record was first compiled in 1924. The total in the first three months of the present year was 15 per cent. greater than in 1928, and 53 per cent. in excess of the aggregate in the same period of 1927, the lowest in the first three months of 1929 being \$11,500,000,000.

I noticed your wife sitting by the window, sewing this morning. I thought you told me she was ill?" "So she was; but today she's on the mend!"

Asked what he understood by "foreign entanglements," a schoolboy replied, "Spaghetti."

Scientists predict a toleless race. The borer is apparently not the only pest threatening the corn crop.

Minard's Liniment for cuts and bruises.

The World's Air Centre

British Ports Will Be Headquarters In Next Decade In Freshwater

Only a decade or two hence and airplanes and airships may be leaving British ports for all quarters of the globe. The Empire and the world at large will be served as regularly as steamers do now. From coach to railway, from sailing ship to the steam and oil-driven levitator of today, from the horse to the car, from the balloon to the airplane the great job of annihilating time and space goes on. And at each new step, in each successive phase, British inventiveness, British engineering, and British skill are to the fore. Nature has marked us down as the centre of the world—London Daily Express.

WOMEN WHO SUFFER

Anemia Responsible For Most Of The Ills Of Girls and Women

Medical science shows that most of the ills that afflict growing girls and women are due to anemia. This condition is either poor in quality or deficient in quantity. This anemia is the cause of low spirits, languor, loss of the poor appetite, listlessness, and the whole bunch of troubles that make life a burden for so many women. There is no need for any more suffering. This is the way, for all the miseries of anemia can be quickly banished by taking Dr. Williams' Pink Pills. It is an established fact that these pills cure the anemia which makes the blood—their wonderful reputation is based on this.

Thousands of formerly weak and ailing women have cheerfully testified to the fact that they owe their restoration to good health to Dr. Williams' Pink Pills. "I am among those who have been helped by Dr. Williams' Pink Pills. Before I began taking them I was in an extremely nervous condition. I could not sleep neither could I eat, and was constantly growing weaker. I got a medicine from a doctor, but it did not seem to have any effect. I then read the recommendation of a friend, I began to take Dr. Williams' Pink Pills. By the time I had taken eight or ten boxes there was no doubt they were helping me. I continued their use until I had taken six or seven boxes when I was again in the best of health. I always keep Dr. Williams' Pink Pills in the house, and if any member of the family feels run-down the pills soon put them in good condition. The best time to begin taking Dr. Williams' Pink Pills is the money you feel the least bit out of sorts. The sooner you do so the sooner you will regain your old-time energy. You can get these pills through any medicine dealer or by mail postpaid at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Agricultural Wealth Of Canada

Figures Show The Importance Of Our Basic Industry

The gross agricultural wealth of Canada for the year 1928 is estimated at approximately \$5,027,301,000, an increase of \$19,352,000 over the 1927 estimate. The total agricultural revenue of Canada, last year, is placed at \$129,304,000 with the following allotments for the nine provinces: Ontario, \$60,821,000; Saskatchewan, \$19,261,000; Quebec, \$27,727,000; Alberta, \$26,428,000; Manitoba, \$14,867,000; British Columbia, \$50,715,000; Nova Scotia, \$46,162,000; New Brunswick, \$31,307,000; and Prince Edward Island, \$21,750,000.

NEVER want to see if a headache will "wear off." Why suffer when there's always Aspiro? Millions of men and women who use it in increasing quantities every year prove that it does remove all pain. The medical profession agrees, so use it as often as it can spare you any pain. Every drugist always has genuine Aspiro tablets for the prompt relief of a headache, colds, neuralgia, lumbago, etc. Familiarize yourself with the proven directions in every package.

Baby's restless nights might be avoided

Scalded skin and other skin troubles are common causes of restlessness, and often could be avoided by careful bathing with Baby's Own Soap.

Its fragrant lather cleanses and soothes Baby's skin, and prevents redness and rash.

"Best for you and Baby too."

Age No Bar To Flying

Lindbergh Says Properly Trained Pilot Is Always Efficient

Lindbergh will be flying as long as he can drive an automobile. He told a group of reporters recently in answer to the query as to whether he expected to retire at a tender age, that he grows older. In the opinion of America's foremost pilot, an aviator skilled in youth can fly as long as he can drive a car. Lindbergh is a proponent of the oft-repeated conjecture that he might give up the air as greater responsibilities caused many persons to think that he would be able to do so.

"I see no reason why I shouldn't," said Colonel Lindbergh. "If a pilot has been properly trained he is just as good when he is old as when he is young. Some of the best pilots in service today are getting along in years."

Canada Week In Glasgow

Prizes Given For Best Display In Grocery Stores

A "Canada Week" was held recently in the city of Glasgow, Scotland, under the patronage of Hon. Lord Provost Sir David Macdonald. Canadian products were displayed throughout the week and attracted great interest among the population. This was the first shopping week to be organized by the city of Glasgow. Cash prizes to the value of \$1,000 were awarded for the best displays of Canadian products in grocery stores. In Glasgow, also, Canada Week was observed at John Barker's great London store, where many show windows and a large floor space were devoted to the displaying of Canadian foodstuffs.

A QUICK WAY TO END BABY'S UPSET SPELLS

"Like other young mothers, I worried every time Baby cried," says a Syracuse, N.Y., woman. "Several times when he was upset or colicky, I tried castor oil but he couldn't retain it. Our doctor told me to try Fletcher's Castoria because it is harmless and builds up the system. I tried my worries and I've used it since for all my children. Castoria never fails to do what I want. It's quick and it ends those upsets of babies and children, such as colic, constipation, colds, etc. That's the reason for its popularity. It's so mild and popular, like all good things, it's imitated, but genuine Castoria—the pure vegetable product, always bears the Fletcher signature."

Livestock Producers

Eight Provincial Organizations Join Hands To Form One Body

Canadian livestock interests were linked up in a single organization in Winnipeg the other day, when representatives of eight provincial livestock co-operative bodies formed the Canadian Co-operative Livestock Producers, with headquarters in Toronto. W. D. McKay, of Moose Jaw, president of the Saskatchewan Livestock Producers, was elected president; H. B. Clemen, of Toronto, manager; J. R. King, of Moncton, N.B., vice-president and treasurer; and J. C. King, of Moncton, N.B., manager of the Maritime Livestock Marketing Board, travelling secretary.

Satisfied Money Was Safe

A man deposited \$10,000 in a bank. A few weeks later he approached the teller and demanded the money. He was asked if he did not want to leave a small balance. "No," he persisted. "I want my money." So the teller counted out \$10,000. By this time a line of people had collected, each one waiting his turn. The man counted the bills very carefully and handed them to the teller. "Here," he said, "put it back. I only wanted to see if it was all there."

The typewriter is credited to C. L. Sholes, printer editor.

Minard's Liniment—good for tired feet.

Final Production Of Radium

Particles Expelled In Final Analysis Appear To Be Lead

Radium is practically the most expensive product in the world and is valued at approximately \$2,000,000 an ounce. Now hospital authorities are anxious because their stocks of radium are slowly transmuting themselves into one of the commonest and cheapest of metals. At varying rates, which cannot be controlled by any known scientific methods, it expels five particles from its atomic nuclei, and these five particles are atoms of helium. Radium is a very heavy element, its atomic weight being 226; helium is one of the lightest of elements, with an atomic weight of 4. Thus the original radium after expelling five helium atoms has an atomic weight of 226-4 x 5, or 206. And 206 is precisely the atomic weight of common lead. It seems certain, therefore, that the final product of this rare and costly element is simply lead.

Takes Millions Of Years

It has recently been computed that the most remote objects made visible by the largest telescope are so far away that it takes light, travelling at 186,000 miles per second, 140 million years to span the distance between them and us.

Asthma Doesn't Wear Off Alone. Do not make the mistake of waiting until you can't wear away by itself. While you are waiting the disease is surely gathering a stronger foothold and you live in danger of stronger and yet stronger attacks.

Dr. D. Kellogg's Asthma Remedy taken early, will prevent incident from becoming chronic and avert hours of awful suffering.

For five cents a tourist can ride for hours around the city of Berlin. A system of transfer makes it possible to change at will from street car, auto bus or subway without paying extra fare.

There is no poisonous ingredient in Holladay's Corn Remover, and it can be used without danger or injury.

Farm Is Best

With grade cows selling for more than \$100 at auction sales, with all farm products selling at high prices, this is not the time for young men to be leaving the farm and going to the cities to work for a bare, and often a miserable living.

A town is made beautiful by each one doing his share in fixing up his own property. It's a case of "You in your small corner and I in mine."

REPARATIONS PLAN UNFAIR TO THE DOMINIONS

Paris.—It was confirmed that the plan for revision of reparations payments by Germany, proposed by Owen D. Young, of the United States, at the reparations conference, would leave Great Britain nothing for the Dominions or for arrears of interest on debt. It would award that country just enough from Germany to pay the U.S. from now on.

The British experts here refute the contention that this is all that is demanded in the Balfour note. They point out the note excluded reparations due the Dominions from its terms.

The absence of direct representation for the Dominions at the conference is considered by the British delegation as all the greater reason for not yielding on reparations to the Dominions share of German reparations. The delegation is generally content to reject that phase of the Young proposals which would reduce the German payments to the Dominions to zero.

The proposals forwarded by the U.S. delegate went far way of a compromise after the conference had become deadlocked on the amount Germany should pay. The Germans refused to meet the Allied demands and Mr. Young advanced a plan involving some reduction.

Eclipse Of Sun In South Seas

Thousands in Manila See Phenomenon Through Smoked Glasses

Manila.—The eclipse of the sun was seen as a shadowy streak across Polynesia and the South Seas.

Manila witnessed the phenomenon with great interest, as seen here, 90 per cent. of the face of the sun being obscured as the moon's bulk came between the solar rays and the earth. The observation cast a spell over the city but did not prevent the sun from casting shadows.

If the natives feared the phenomenon there was no sign of it here. Thousands of all ages viewed the eclipse through smoked glasses or other improvised instruments.

Word was eagerly awaited from the south of here, where five sections of the expedition located their instruments to view the phenomenon.

Disappointed In Arms Parley

Stressmann Discusses Failure To Reach Definite Decision

Berlin.—Gustave Stressmann, foreign minister of Germany, discussed disarmament and the Paris reparations negotiators in a speech at the annual banquet of the Foreign Press Association. Although he specifically disclaimed any desire to touch on political touch to those situations, yet his remarks, especially regarding disarmament, drew disappointed glances and even alarm at the French and the Geneva conference to reach concrete and definite decisions.

Oppose Bill For Back Pay

Ottawa, Ont.—Five Manitoba Liberal members have joined notice on the government they will oppose Hon. Peter Venlo's bill to pay \$150,000 to the postal workers who went on strike in 1919 and who are taking back into the service. The dissenting Liberals are: Messrs. Glen, Lovie, Stedman, Brown and Mills. The bill will have to be radically re-drafted or it will be quietly dropped entirely.

Ice Breaks Up On Yukon

Dawson.—The ice in the Yukon river in front of Dawson hotel moved out on May 7, heralding the advent of spring and summer. First prize in the guessing contest on the movement of the ice was divided between Thos. Leach, of Dawson, and John Kennedy and Grace Stewart, of Anchorage, Alaska. The approximate amount of the prize was \$7,200.

Fails In Altitude Test

Montreal.—After reaching a height of 17,000 feet, Captain M. E. Jones, chief pilot of the Curtiss-Ried Air Corp. at Cartierville, was forced to give up his attempt to break the world's altitude record here. Jones made his attempt without aid of oxygen and in an open cockpit plane.

Adopt Great Crossing Bill

Ottawa.—Third reading was given in the Senate of the bill amending the Railway Act with reference to the expenditure of \$200,000 a year to eliminate grade crossings.

W. N. T. 1783

Riots Cause Controversy

Part Played By Police In Berlin Brought In Criticism

Berlin, Germany.—Bitter controversy continues in the Berlin press and among the public as to the part played by the police in suppressing the Communist riots which broke out on May day. Fugitive Communists of twenty-four victims of the riot are said to have revealed that 17 had been killed by police bullets.

The official inquiry has been unable to establish that a single shot had been fired by a civilian against the police. Only one policeman of the 40-odd injured had received a bullet wound but would be held accountable inflicted upon himself.

One hundred and fifty shopkeepers of the Wedding district, where rioting was said to have been very severe, declared that the streets were quite safe from Communist excesses and that a simple police patrol would have sufficed.

Meanwhile, 45 persons of 117 arrested had been sentenced to short terms of imprisonment for disturbing the peace. The rest were released for want of evidence.

Should Not Be Disfranchised

Committee Thinks Persons Receiving Charitable Aid Entitled To Vote

Ottawa.—The parliamentary committee on privileges and elections has decided to recommend a change in the Elections Act so that persons receiving charitable aid should be allowed to vote. The act as it stands prevents persons receiving such assistance either by direct gifts or by living in a charitable institution, from voting.

The committee felt that with many varied forms of charity, assistance now being extended to persons in unfortunate circumstances should be taken far reaching to disfranchise them. The act as it stands almost impossible to differentiate.

The committee refused to agree to the suggestion that the courts prevent judges from being eliminated. The general opinion seemed to be that the courts should not be placed in the position of either supporting or opposing the government by annulling their judgments.

L. J. Ladd, Conservative, Vancouver, by annulling their judgments, he considered it was an insult to the courts.

Cannot Attend Function

Alberta Women Unable To Accept Invitation From England

Edmonton.—None of the five Alberta women who were expected to visit England on June 17 when the Privy Council is to hear their appeal from the decision of the Supreme Court, could attend a great public function to be held in their honor in London.

The invitation, which also carried with it an offer of assistance, has been tendered by a group of women in Great Britain, including members of the Imperial parliament and other notables who have achieved distinction in politics, business, the professions, literature, education and social endeavor.

The Alberta appellants are Mrs. Marietta Edwards, Mrs. Nellie McClung, Mrs. Louise McManis, Mrs. Irene Parry, and Magistrate Emily Murphy.

From On Practice

Toronto.—A warning to patent medicine through the practice of having sample pills and patent medicines through the practice of householders for advertising purposes was issued today by Hon. W. H. Price, attorney-general. He ordered an inquiry into the death of Audrey Ginner, Kitchener girl, who died after eating pills that had been left at her door.

Optimism Seizure At Coast

Vancouver.—A seizure of optimism valued at more than \$7,000 was made on the I.L.M.S. Express of France by officers of the customs preventive service, according to a report from that office. The seizure consisted of 81 tons and 100 lbs. of opium, the ship's funnel. No arrests were made.

Many Russians Drown

Moscow, Russia.—Many persons were drowned when a wooden dam broke while it was crowded with spectators watching the ice floes during a spectacular race of the river Dvina. The river was many feet above normal, causing a serious flood.

Marooned Trains Released

Were Held Up During Ten-Day Blizzard In Northern Manitoba

Winnipeg.—Freed from northern snows by a lull in low temperatures, two Canadian National freight train were able to proceed on way to Churchill, the prairie outpost on Hudson Bay. Both trains had been held up during a ten-day blizzard that had swirled down from the northland almost to the coast.

After days of almost unrelenting snow the snow plows succeeded in battling through the trains, on one of which were 160 men en route to Churchill for the department of railways and canals.

AMENDMENTS TO ELECTION ACT TO BE FORTHCOMING

Ottawa.—Candidates should be allowed to hire automobiles or other conveyances to carry voters to the polls on election day was one of the amendments to the Elections Act, which the special committee of the House of Commons reviewing the Dominion Elections Act, Sec. 28, which makes the practice an offence to be deleted. There are at present one-third too many polling stations in the Dominion. The committee, Colonel O. M. Higgs, former chief electoral officer, stated, approximately \$10,000 would be saved by the deletion of a revision of subdivision boundaries. Sec. 28 is to be amended to meet the difficulty.

Sec. 27 is to be amended so that an election officer guilty of a wilful offence shall be subject to a fine of from \$200 to \$500, or half the fine is to go to the informer.

A new section, "3-A," was added, providing that election officers or documents may be fastened to poles or wooden structures despite any municipal by-law.

Sec. 4 was amended so that although hand bills or otherwise must bear the name of the printer, the candidate can be understood by the doer. It was explained that the section is to prevent anonymous material being circulated.

Farmers and labor organizations may hereafter contribute to election expenses as a result of removing Sec. 9. The action provided last November was to be removed.

The action provided last November was to be removed. It was specially formed for election purposes. The chairman, C. F. Power, Liberal, Quebec South, said that the section operated unfairly in the case of farmers and labor organizations.

Alaskan Survey Planned

Washington, D.C.—Inventory of the vast resources in timber and hydro-electric power in Alaska, the beyond inaccessible mountain ranges in southeastern Alaska is to be taken this summer by army aviators. Flying photographers with multiple lens cameras will unfold the secrets of hidden lakes and inaccessible forests like a magic carpet, hovering in the air.

New York Doctor Loses Radium

New York, N.Y.—Somewhere in New York, \$25,000 worth of radium is smoldering slowly through its tiny containers and threatening burns to anyone who touches it. It was lost by Dr. J. J. Eller, a skin specialist, who believes he lost it in a taxi-car.

SPOKESMAN FOR GERMANY

Dr. Hjalmar Schacht, president of the Reichsbank, and spokesman of the reparations conference in Paris.

Suspect Grain Mixing

Think United States Sent Wheat To Mixed With Hard Wheat Of Canada

Vancouver.—Possibility that some United States soft wheat is being sent to this port and mixed with Canadian grain is interesting the Saskatchewan Royal Grain Commission just now. Evidence has been produced that at least one such vessel was in port in this spring, with a part cargo of soft wheat and loaded the balance of the ship with Canadian grain. The port warden was before the commission, to explain just what safeguards there are to prevent anything of this sort. His evidence was clear on the point, that in such an event, no government certificate would be issued to cover such a mixed cargo, but that there was nothing to prevent mixing after the Canadian grain had been inspected into the vessel. In such an event, the Canadian certificate could not be construed as covering such a mixture, though over-seers buyers might be deceived as to just what kind of cargo they were buying. It was pointed out that ships en route to the Orient from Seattle, frequently come in here for grain, and many of them have soft American grain aboard. There is a mixture of soft and hard wheat in the port. Canadian hard wheat, and the balance soft, from the United States, just this is not covered by a Canadian certificate.

Plans Flight To Sweden

Second Attempt Will Be Made By U.S. Aviator

Chicago.—Another flight to Sweden from the Middle West is being planned by Bert Hassell, Ried, Ill. aviator.

Hassell, who piloted the "Great Rock" on its projected Rockwell-Sweden flight last summer and was forced down in the snow fields of Greenland, declared his next flight would be over a route with nine refueling points.

Hassell predicted that within five years regularly with "pay loads" will fly airplanes between Copenhagen and Seattle. The route from the Middle West to northeastern Europe, he said, is his longest stretch over water being only six hundred miles.

To Circle the Globe

Plans Being Drawn Up For Graf Zeppelin To Make Flight Around the World

Washington, D.C.—The post office department was advised by U.S. diplomatic officers in Germany that plans are being made for the Graf Zeppelin to make a world trip, starting and ending at Lakehurst, N.J.

Trips from Germany to the United States and back is due to start soon, after which the post office department was advised the airship would return to this country to start circling the globe.

Must Watch His Colors

Party Workers In England Must Be Wide Awake

London.—The party worker who slips lightly from the constituency election campaign during the general election campaign will have to keep a sharp eye for his colors. For a long time, the party workers in British elections, no party has national colors except the Labour party. Sometimes the colors in one constituency are completely reversed in another. Occasionally it is a tall awkward for the party enthusiast who wanders far afield.

SAY POOL WILL NOT SELL GRAIN AT A SACRIFICE

Winnipeg.—If western wheat pools are blamed for the grain blockade at Port Colborne and Montreal, they are not concerned at the situation in which they would be reduced to refuse to be made the "goats," according to pool officials' statements in the Winnipeg Telegram.

"We could mitigate the situation if we wanted to sell our grain at a sacrifice," commented a senior official of the pools, "but we refuse to farmers pay for a situation that is not our fault. Don't misunderstand. We are selling a certain amount—we are not refusing sales."

"The world would not be out of our making. There is an enormous amount of grain in the world, and the supply is not exactly limited. We could move the stuff, but we are not going to penalize our farmers by doing it."

"Why should we relieve the congestion that exists? Why should we let our own Montreal officials claim blame when they like—we refuse to be the goat."

Saskatoon.—A report from Montreal which blames organizations of farmers for grain congestion at the port of Montreal, which suggests that Western farmers should accept a lower price in the market, was met by the farmers of H. Williams, president of the United Farmers of Canada, Saskatchewan section.

"The report published by the Montreal Star," he said, "purporting to come from an official of the Montreal harbor commission, can hardly be regarded as a very fair statement."

"The article finds fault with western farm organizations because they, through the agency of the western pools, are underbidding the price of wheat up to a level where it will pay the cost of production."

"The report indicates that the official of the harbor commission makes it very clear that the profits of the harbor commission are being interfered with and we have no solution is to lower the price of wheat."

"This has always been the solution of commercial organizations handling the farmers' produce, simply to pass on to the farmer any surpluses that may come up and safeguard the profits of the handling company. To cover up this demand they suggest that a drop of even a cent would relieve the situation."

"If this is so, how is it that a drop of nine cents in the official market does not relieve the situation? Can it possibly be that all the real wheat is in the hands of the pools, who are holding it for a speculative price, and that all the howling is about a lot of paper wheat in the hands of speculators, which does not exist in real bushels at all?"

"Somebody ought to explain it! Possibly 100 per cent. control of the wheat by the pools might not be such a bad idea after all. Apparently it's their stock would be to wait until a lot of market wheat and let us know just where we really are."

MARITIME GRAIN RATES CASE IS POSTPONED

Ottawa.—Application of the maritime board of trade for a reduction in grain rates from Port William to St. John, N.B., and Halifax, N.S., heard at three sittings of the board of railway commissioners. Chairman of the board, Mr. J. H. McKeown, on the board, it was announced, will hold local meetings at St. John and Halifax some time in July. Later, a final hearing on the application will take place here.

A rate of 19.54 cents per hundred pounds on grain shipments from Port William to the two ports on the Atlantic seaboard is sought by the application, as against the prevailing rate of approximately 21 cents. The rate now effective from Port William to the port of Quebec under the general tariff is 19.54 cents. It is now 19.54 cents a hundred pounds.

Hearing of the application was scheduled before the board here, but H. A. McKinnon, of the Maritime Railway, K.C., counsel for the Canadian National Railway, presentation of the case has been postponed until July.

Heads Victorian Nursing Order

Hon. Geo. F. Graham Re-Elected President Of Order Governors

Victoria, B.C.—Hon. Geo. F. Graham, was re-elected president of the Board of Governors of the Victorian Order of Nurses for Canada at the annual meeting of the order here. Hon. W. K. Makin, of the order, is one of the four vice-presidents.

Tribe was paid to Mrs. James Macdonald, of the order, and Mrs. William Dennis, Halifax, and the two splendid women with whom the idea of the order, first originated. Letters of gratitude and congratulatory from the conference to the order were presented.

Miss Elizabeth Stenhouse, chief superintendent of the order, gave a comprehensive resume of the work during the past year. Victorian Order Nurses attended 65,231 patients and made 24,216 visits, an increase of 10,000 over the previous year. Of these 45,474 were free nursing visits.

Wheat Nipped By Frost

Grain In Brandon District Will Grow

Brandon, Man.—Wheat shoots on hundreds of acres in the Brandon district have been nipped off by continued night frost. Grain that in some cases reached a height of one and one-half inches has been levelled. Farmers state that the grain will grow again without re-seeding and some contend that the new growth will be a benefit, strengthening the root.

Investigating Malaria Among Horses

Saskatoon, Sask.—Dr. Seymour Hadwen, professor of animal pathology at the University of Saskatchewan, and a member of the Dominion research council, has gone to British Columbia at the request of the Dominion government to diagnose an unknown malady which is wrecking havoc among horses of the coast province. He is accompanied by Dr. H. M. Torry, president of the research council.

Photograph Records Of Speeches

Montreal.—Photograph records of speeches of 13 leading politicians, including leaders of the three main parties, are being distributed for use in rural areas in the present campaign. The records will probably prove of great value, apart from their use in the present campaign, as interesting examples of personal styles of oratory.

Must Complete Line

Ottawa.—In a judgment handed down by the Board of Railway Commissioners ordered the Canadian National Railway Company to complete the construction of a branch line in connection with the operations of the C.N.R. Co. Ltd., in the Rocky Mountain forest reserve, in Alberta.

Oratory Finals

Toronto, Ont.—The Dominion oratory finals will be staged here on May 17. It was announced that provincial champions will strive for the right to be Canada's representative at the international oratory championship in Washington, on October 26.

A BROWN STUDY

Brown is a more rustic and careful color, the car designers and interior decorators of the Canadian Pacific Railway have decided, so this will be the predominant note in the sumptuous new sleepers just built by the company's Angus shops at Montreal especially for service on the Trans-Canada Limited. The exterior, the car will be a rich brown, and the wood finish a lustrous walnut. Permanent headboards, too, will give added privacy, dividing each section from its neighbor. The river. The river was many feet above normal, causing a serious flood.

The exterior, the car will be a rich brown, and the wood finish a lustrous walnut. Permanent headboards, too, will give added privacy, dividing each section from its neighbor. The river. The river was many feet above normal, causing a serious flood.

Predicts Doubling The Wheat Yield

Can Be Accomplished Through Soil Purifying For Rust Susceptibility

Doubling the yield of wheat per acre in America within 10 years is predicted by H. H. Whetzel, professor of plant pathology at Cornell University.

This will be done he says, through application of a recently developed method for wiping the rust parasites from wheat by sulphur dusting.

Stem or leaf rust of wheat, like its namesake in steel, is an inconspicuous scourge. It is a microscopic fungus, visible only as a slight discoloration. How devastating it is, however, has been disclosed fully only when experimental fields were protected successfully from rust.

In Manitoba, Professor Whetzel says, sulphur dusted wheat produced 40 to 50 bushels an acre, against yields of but 30 to 20 bushels from fields unprotected against rust.

Leaf rust of wheat, long known in southern grain areas, has not been considered a specially bad pest. But experimental results have shown that it is becoming acutely felt. Professor Whetzel says, revealed that this form of rust regularly reduced crops by about 20 to 30 per cent.

The sulphur dusting method has been under experimental development for several years in areas representing different kinds of wheat growing conditions.

The pathologist foresees power machines dusting wheat over a wide area in future grain fields. He believes it will take a decade to put over the cereal dusting idea, but that handsome profits will long accrue and pay the bills besides. Two or three dustings a season are sufficient he says, when they are timed properly.

Trees For Windbreaks

Wide Spacing In Planting Permits Horse Drawn Cultivation

Many varieties of trees are proving suitable for windbreaks in the Prairie Provinces. At Swift Current, Saskatchewan, nineteen varieties are classed as ornamental. In the report of the superintendent of the Department of Agriculture, at Ottawa, it is shown that thirteen of the varieties tested have withstood winter temperatures without any killing whatever. These include: *Giant Maple*, *Siberian Fir*, *Woody Caragana*, *Common Lilac*, *Villosa Lilac*, *Tartarian* and other Honey-suckle, *Missouri Currant*, *Siberian Dogwood*, and *Juniper*, being about eight feet apart under dry conditions is recommended by the superintendent of the station. This method, he states, allows access for horse-drawn cultivation for a longer period of time than is permissible by closer spacing. This is a matter of much importance, because it facilitates weed control. Such trees as poplars, elm, maple, ash, spruce, and Scotch and Jack pine do remarkably well. Poplars planted as cuttings in four years had reached heights of from fifteen to twenty feet.

Presented With Flag

The flag of Bermuda was presented to the R.N.S. "Lady Rowena" of the Canadian National Revenue Service when she called at Hamilton on her maiden trip this month. Admiral Somers founded the colony of Bermuda in 1609. In presenting the flag, the president of the Bermuda Chamber of Commerce said this fleet of ships was proving salvation of the agricultural industry of the island.

Prof. Gray: "What is the action of belladonna against the cerebellum?" Barnes: "Yes, Prof., that's the first time I knew they were using each other!"

"Talking about babies, my mother has told me, that when she was born she weighed less than three pounds."

"By Joe, how awfully interesting what! And—er—old she live?"

"Anaxor Mountbatten," I have just my way, and I have been in light."—Hummer, Darlin.

"The man is no honest he would not steal a pin," said the admiring friend.

"I never thought much of the pin test," answered Miss Cayenne. "Try him with an umbrella."

Alice—"How many students are there at your college?"

Geoffrey—"Oh, about one in every ten."

W. N. U. 1785

Disadvantage Of Large Cities

Neighborhood In Leisure People Have To Win Out

Life in the big cities has its attractions, but neighborhood even among people who live in adjoining houses isn't one of them. The other day an automobile was left parked in one of the residential sections of Detroit for four days. People passed it and no, never thinking it odd that the owner didn't drive off with his property—or if they did think of it, they didn't bother about it. Finally a policeman investigated and found that the car contained the lifeless body of a woman. The murderer merely disposed of the body by leaving it in the abandoned car, which turned out to be the easiest way to get rid of it without detection. It might have been there yet had the policeman not come along.

People in most big cities do not know and do not care who their neighbors are. They just go ahead minding their own business and expecting others to do the same. Sometimes it isn't so easy or desirable to be so inquisitive, as they drop the idea of becoming acquainted. But they are thus missing one of the most coveted pleasures of life—neighborhood. The beauty of life in the smaller cities is enhanced by the ability to know and see one's friends, and to enjoy their company, and if they are small cities is the most ideal place of residence. One can have neighbors and get the most sociability out of life. Life without neighborhood is like life without a neighbor. It is unbearable to anyone who has become acquainted with the joy it puts into human existence.

Sweet Clover

Seven Varieties Tested At Swift Current Experimental Station

There are several varieties of sweet clover grown in the Prairie Provinces. The results of the tests of the Swift Current Experimental Station reveal seven varieties were grown side by side. None of these gave very high yields, but all of them made fairly good stands when sown alone on fallow ground. The variety *Zorica* reached a height of 27 inches at harvest time, yielding 1.35 tons per acre per head in 1927, and 1.58 tons as the average crop for three years in succession. Variety called *Dwarf*, growing to a height of only 15 inches, gave practically a ton and a half of hay in the first three years average. *Common White*, that reached 28 inches high, yielded 1.29 tons of hay in the first three years. *Grundy*, County, tested two years, gave a lower yield of about a ton and a third. *Macror* yielded 1.29 tons of hay in the first three years, and Arctic 1.19 tons as an average for three years. These results are given in the report of the superintendent of the Swift Current Experimental Station, published by the Department of Agriculture, at Ottawa.

The Value Of Resistance

If Things Were Made Easy Development Would Be Retarded

No doubt a world in which matters never got out of place and became dirty, in which there were no frictions, in which goods, in which goods had no weeds and food grew ready cooked, in which clothes never wore out and washing was as easy as advertisements describe it. In which the right word was not hard to find and there were no exceptions, and things never went wrong, would be a much easier place to live in. But for purposes of training and development it would be worth nothing at all. It is the resistance that puts us on our mettle; it is the conquest of the reluctant that gives us the pleasure of it. I wish you enough difficulties to keep you well and make you strong and sturdy.—Henry Van Dyke.

Out Of His Line

Roaming interestedly through Harlem, a stroller overheard on this conversation between two colored preachers. "Where you all—a preaching now, brother?" "Nowhere," was the answer. "A fine preacher like you is too," said the first. "That just it," retorted the other. "I'm a preacher's preacher, and what like congregation wanted you, a grayish preacher and that ain't in my line. Seems like they's too much specification nowadays."

"The man is no honest he would not steal a pin," said the admiring friend.

"I never thought much of the pin test," answered Miss Cayenne. "Try him with an umbrella."

Alice—"How many students are there at your college?"

Geoffrey—"Oh, about one in every ten."

Cream For Buttermaking

Should Be Stored In Deep Pails, Standing In Ice Water

The place and method of storing cream bears a close relationship to the quality of the butter from which it is made. The practice of holding the cream in cellars is not the best, according to pamphlet No. 37, of the Department of Agriculture, at Ottawa. The *Care Of Cream For Buttermaking*. Experiments carried on by the Dairy Branch and referred to in this pamphlet, proved that cream can not be kept sweet for thirty-six hours, or for delivery to the consumer. It was also learned that cream left uncovered in the cellar has a tendency to develop an objectionable flavor which shows up clearly in the butter. A much better way of keeping the cream is to store it in deep pails standing in ice cold water. Even though the temperature of the cellar is as cold as that of the water, the cream keeps better under the water system, the difference being principally in the rate at which acidity is enhanced. When kept for thirty-six hours in a water-cooled tank with the cream at 52.8 degrees, the percentage of acidity was 137. Kept for the same length of time in a cellar at 64.5 degrees, the percentage of acidity was 147. Kept for the same length of time in the ice water at 53 degrees, the percentage of acidity had reached only 165. The ice water cooling especially desirable where cream cannot be delivered to the creamery often than twice a week. In such a case the temperature of the cream must be kept down to forty-eight if the cream is to be delivered in a satisfactory condition. Frequent delivery of the cream is desirable even when the best system of storage is used. Keeping the cream for longer than two days at the farm has a tendency to increase the acidity of the cream. The cream of the old cream flavor so common in gathered cream butter.

Minute Calculations

Seattle Chemist Finds Delicate Scales An Interesting Plaything

A Seattle chemist who recently purchased an up-to-date and very delicate set of scales has worked out some interesting problems with his latest plaything. A strand of human hair, he states, long enough to envelop the world at the equator, would weigh 759 pounds.

The ordinary domestic variety of pin weighs .024785 ounces. The ordinary 2-cent postage stamp is lighter than the air mail stamp, the weights respectively being .0129724 and .0139724 ounces. A yard of any human hair, one inch long, weighs .00002 grams or .00000066 ounces.

Can you see quite well, darling? Yes dear, thank you. No one in the way? No, dear. Then change places with me.

Jack (over the phone): "And please may you ring back to me." Jacqueline: "You'd better come and get it: glass breaks so easily in the mail."

Hatching Chicks In Old Fashioned Way

Poultry Husbandmen Give Modern Hints On How To Obtain Best Results

When chicks are to be hatched by the natural method it is well to select several hens at once. As the eggs are tested from time to time and the infertile eggs removed, those remaining can be given to fewer hens. Then when the chicks hatch a few hens will be able to brood a larger flock of the same age. When this system is used the hens from which the eggs have been taken may be re-set and kept going for several seasons. P. C. Elford, the Dominion Poultry Husbandman, recommends thoroughly dusting the hen with sulphur or insect powder before she is set and the hen placed on the eggs, preferably after dark. To test the hen as a brooder it is well to give her a few common eggs for a few days and if still inclined to set she may be given a setting of hens. It is important to see that the nest is perfectly clean and disinfected before allowing the hen into it. It is regarded as good practice to set the hens where the laying stock cannot get to them. A colony house seems an ideal place for this purpose. There should be kept near at hand a constant supply of fresh water and hard grain either placed on the floor or in a hopper as well as green feed. Some hens do not set as well as others and Mr. Elford regards it as unadvisable to set such hens. It is regarded as better to work for several weeks. This may be done by removing the eggs to other places before they are hatched. If they continue to set well and keep in good flesh it may be possible to keep them at work for several weeks. It is better to have a few chicks or putting them back into the laying pen.

Leghorns, though they may become broody, seldom make satisfactory setters. Hens of the medium or larger size that are not too clumsy and awkward should be used for incubation. Hens usually set better than pullets.

Saskatchewan Egg Pool

Quantity Marketed Through Pool Has Cash Value Of \$400,000 Last Year

Eggs to the number of 1,498,182 dozen, of a cash value of \$400,000, were marketed through the Saskatchewan Egg and Poultry Pool during the past year, and the prices paid were the highest average prices ever paid by the Pool, said Mrs. John Holmes Asquith, president of the pool, in her annual report to the delegates. Mrs. Holmes said that direct shipments netted 25.5 cents for extras, 23.6 cents for firsts; 19.6 for seconds, and 15.5 for cracked eggs, which prices were regarded by members as being very satisfactory.

Phyllis (yawning): Well, what shall we do this evening? Algy: "Let's think hard—"

"No, let's do something you can do, too!"

Mistress: "And why did you leave your last place?"

The Cook: "It was so far away my husband had to take a taxi to eat with me."

OBJECT OF HISTORY

This place of stone from the ruins of Fort Prince of Wales, opposite Churchill, is the first authentic piece of freight shipping over the Hudson Bay Railway from Churchill to Winnipeg. It was presented by W. C. Mauders, freight traffic manager of the Canadian National Railways, to the Board of Trade of Winnipeg on the occasion of the 50th anniversary celebration of that body on April 26th. The president of the Board of Trade was asked to sign the freight delivery sheet for the stone, which will be suitably engraved and placed in the museum of the Board of Trade.

Fort Prince of Wales was, in its time, one of the strongest forts on the continent. It was begun in 1735, completed in 1747, and demolished in 1782. It had 46 cannon, of which 32 lie among the ruins. The site of the fort is directly across the harbor from Churchill.—Photograph Canadian National Railways.

London Taxidriers Are Very Reliable

Known Taxidriers By Heart and Take Shortest Possible Route

The taxidriers of London may be less beset than the Parisian cabs but they are none the less typical of their own city. Many of them are old men, veterans of the horse-car or "growler" days, who seem to have advanced in years a good measure gracefully than their vehicle. A visitor taking his first trip in a mechanized city-hauling carriage will swear that he is riding in the original taxicab.

Nobody seems to know the age of a London taxi, and it would be safe to classify most of them among the more mature motors. They are probably as comfortable as any cabs in the world. The passenger sits, pulled down the folding seat for a cover, and is kept awake by the rattling of the window panes. The driver or honsks the horn continually, an almost constant accompaniment to conversation with the pilot of a bus, who is fortified behind the extension of the front hood like a Roman warrior sheltered behind a shield.

Most of the taxidriers know the city and its suburbs by heart. The majority will follow the same route between any two points in London, and the route usually avoids traffic delays and is a shorter journey for your destination.

No Substitute For Walking

Physicians Agree That No Better Exercise Is Known

No physician has ever found anything so effective to increase vitality as habitual walking in the open air, nor, it may be said, as physical culture. These men who motivate the souls of their office and devote every ingenuity to avoiding taking a few steps during the day, then, when motor buses, and cars, and in day out, are going to the sooner or later they would if they used their feet regularly for walks in the open air. There is something in the habit and physical effects of walking—and by walking is meant swinging arms and legs in a rhythmic step and not merely dawdling—tend to keep a man fit in his 50s, 60s, 70s and 80s. Men did not give man legs as a reward for his services to the cause of the world. Legs are made to use. Neglect to use them exactly to their capacity. Many men who ride 30 miles in his automobile and thinks he has exercised would be in Germany. After working on the land six or eight miles a day also. There are times for taxis and pleasure driving. Enjoy them and make them a pleasure, but do not let the walking that is so valuable to health.

Opening Last Frontier

Aviation Has Helped To Speed Up Work At Canada

The northern part of Canada is the world's last frontier and its opening coincides with the development of flying. Aeroplanes have been successfully used for aerial surveys, for explorations, for fire patrol, and for transportation, and new regions have been opened with rapidity that would have been unthinkable in the old days of canoes and dog-trains. In the process Canadian flyers have themselves substantially adept in developing new uses for planes, and in the utilization side of flying. They have made splendid progress in overcoming the difficulties of winter flying, and deserve great commendation for breaking into what too many people, including Canadians, have insisted on regarding as the frozen North. The conquering of the last frontier is being made by air.

Birds In The Making

Two nests met after a long interval.

"What have you been doing lately?"

"Well, as a matter of fact I've left the state," replied the other.

"But what made you do that?"

"Well, I had a hint that I was not suited to it."

"Oh, I see," said his friend; "the little birds told you, eh?"

"Well, no, not exactly, but they might have become little birds if they had been allowed to hatch."

League Doing Great Work

The League is a fact, and perhaps the greatest fact in the world of today. Already it has prevented wars, it has saved lives and kept out of the nations as society hounds individuals, yet leaves them free liberty. The League has done great work and will, with the support of the people who make up the nations, do more.

"Preventor Of Ills" Doctor Of Future

Opinion Expressed By One Of World's Greatest Surgeons

"Preventive medicine will be the supreme human science of this century," one of the world's greatest surgeons, Sir William Arbuthnot Lane, predicted during an interview at his Mayfair residence. The conversation ran mainly on two subjects: (1) the value of natural sunlight, and in many cases the violet rays in connection with the prevention and cure of disease; (2) the importance of dieting in relation to a convalescent patient.

"Man needs a certain amount of sunlight. And where he cannot afford the expense of travelling, to places where the sun shines, many cases the so-called 'artificial sunlight,' or ultra-violet rays, offer an excellent substitute."

He added: "But people have new notions."

Emphasizing the importance of preventive medicine, Sir Arbuthnot read aloud an extract from an article of his in "The Golden Health Library," a health encyclopedia in magazine form which the great surgeon has just founded.

The underlying conception of this work is, he said, "that good health can be attained and preserved by ascertained principles of living. It is not a close secret of the medical profession, nor is it to be found in specific foods and prescriptions. Modern civilization is obsessed by the disease complex and medicine which is dominated at least as much as other professions by the state of public opinion, still stands to think itself away from the world of health and tending toward its function. The physician as 'healer' still carries the stigma of disease and suffering attached to his function. It is not to be denied that it is the physician as 'preventor of ill' who will be the doctor of the future."

Exchange Farm Youths

Three Agricultural Students From Germany Placed On Western

Under an arrangement between the colonization department of the Canadian National Railways and the German Agricultural Students Association, three young men from Germany have been placed on large farms in British Columbia. They are also placed in eastern Canada where Canadian youths will be given an opportunity to acquire similar experience in Germany in exchange.

All of the young men are graduates of agricultural institutions in Germany. After working on the land until after the harvest they can, if they wish, attend an agricultural college for the balance of the year. They will spend in Canada or they can remain on the farm for the full period.

Ship Eggs To California

Record Shipment Of 30,000 Eggs Sent To U.S. From British Columbia

A record shipment of pedigreed White Leghorn hatching eggs was made recently by the Poultry Breeder's Association of British Columbia to a hatchery at Patamela, California. The shipment consisted of 30,000 eggs, valued at \$5,000.

The British Columbia eggs, which were all laid by pedigreed stock, will, it is understood, be used to obtain pedigreed stock for distribution among the poultry farms in California supplying eggs to the hatchery.

One of the Audience—"I've heard that you women who go around telling men to be nice to children neglect your own."

Lecturer—"You're mistaken. I never had any children."

Lawyer—"And what grounds have you got for a divorce, madam?"

Film Actress (thoroughly)—"Well, I've got a husband."

"Oh, I see," said his friend; "the little birds told you, eh?"

"Well, no, not exactly, but they might have become little birds if they had been allowed to hatch."

"The man is no honest he would not steal a pin," said the admiring friend.

"I never thought much of the pin test," answered Miss Cayenne. "Try him with an umbrella."

Alexander Mountbatten: "I have just my way, and I have been in light."—Hummer, Darlin.

First Fortnightly Crop Report

Issued by Department of Agriculture,
Edmonton, May 11, 1929.

Approximately seventy-five per cent of the wheat crop in the province has been seeded and steady progress is being made with the seeding of coarse grains, according to telegraphic reports received on Friday by the Department of Agriculture. A peculiar situation exists, as in the part of the province where moisture has been most abundant, spring work has in consequence been retarded to the greatest extent. A number of central and northern sections report that wheat seeding has been completed, while as a result of intermittent rains and falls of snow over the southern part of the province, not more than thirty or forty per cent of the wheat has been sown in some localities.

Moisture conditions are reported to be generally satisfactory, particularly in the south where the effects of the open fall and the light snowfall of the past winter have been largely offset by the recent precipitation. In some northern districts winds have been more than usually prevalent, and while the soil moisture is sufficient to promote germination, further rains will be required at an early date if rapid growth is to be expected.

An increase of from 5 to 19 per cent in the wheat acreage of the province is anticipated, as compared with last year. This gain will be especially noticeable in central and northern sections, where a large amount of new land was cleared and broken in 1928 in readiness for the present year's crop. Very little difference is expected in the acreage seeded to coarse grains, except in areas where seeding of wheat has been unduly delayed.

Good stands of fall wheat and rye are reported, as these crops have come through with a negligible amount of winter killing. In a number of districts an increased acreage will be seeded to sweet clover and other forage and fodder crops. Wheat seeding has been practically completed in the Peace River country and coun-

Announce Reduction in Amusement Tax

The existing tax on low priced tickets of admission to such places of amusement and entertainment as moving picture houses, chautauques, etc., has been cancelled by a recent order-in-council of the Alberta Government. Admission prices not exceeding 50c will hereafter be exempt from tax, the only exception being places for public dancing. The order is to be effective on June 1st. No change will be made in the case of tickets for which more than 50c is charged.

try and moisture conditions are satisfactory at the present time although additional rains will be needed shortly to support the present excellent prospects. In this section of the province, a very marked increase is noted in the acreage being seeded this season.

Owing to the abundance of feed available during the past winter, live stock generally has come through in good condition and pastures are already showing good growth.

of \$600.00. The council agreed to lease the N.E.-3-26-5-4 to A. E. Weatherall for hay for the sum of \$10.00 cash.

The council decided to lease the N.E.-24-27-6-4 to P. McBean for the sum of \$10.00 cash for pasture.

Roadwork pay sheets in favor of F. G. Austin for \$5.10 and H. A. Sullivan for \$27.00 were passed.

The council decided to pay cash for roadwork after 1929 taxes are paid.

Accounts amounting to approximately \$300.00 were approved for payment.

Meeting adjourned to meet again on the second Saturday of June.

Build New Church

To build new Church, thus spoke the News:

Six thousand bucks they'll have to use.
So let our hearts in union beat,
Let's all united work, and breathe,
No matter what our creed may be,
One more good Church, and two,
makes three.

Don't matter how with faith, we're blessed!
Some strong, some weak as oft expressed.
And there was set for all the folks,
A day to rest our six day yokes:
Then all may help to build the Church.
If only we our pockets search:
And anyone who house complete,
May find his rest in Church-house seat:

As when the Church-day calls around,
And Church-bells tolls its timely sound,
It matters not how near, or far,
Just lie and listen to a star,
And fall in line with Church-house folks:
This day let rest our six day yokes.

—ANDREW OYEN.

British Admiralty Has Brought To Perfection An Electrically Controlled Torpedo

After several years of experimenting with a new type of electrically controlled torpedo, the British admiralty has brought to perfection a projectile which follows the target and carries sufficient explosive to blow the vessel in two when it scores a direct hit, according to reports heard today.

In a test on the admiralty range at Portsmouth harbor, one of the torpedoes got out of control and tore around the harbor at 40 knots. Past admiralty vessels chased it, but they could not overtake it and finally the torpedo landed at Weymouth beach.

Spectators were not allowed to approach within 100 yards of the mysterious projectile and photographs taken by several persons were confiscated for fear the secret of the torpedo's mechanism might be revealed.

The torpedo is not fired like an ordinary torpedo but is launched into the water. Thus the vessel that is carrying it is able to hide in a cove and destroy the enemy fleet with these electrically guided torpedoes without revealing the torpedo carrier's position by an explosion. Once launched, the torpedo is steered by a small wireless apparatus looking like two-tube amplifiers.

The first current applied starts the powerful driving mechanism at the back of the projectile. As it travels forward, a fine spray of water is blown behind it apparently acting as a sort of aerial. A second wave current controls the steering apparatus which gives remarkable control, enabling the torpedo to follow all the twists and turns of the target. A fan, similar to that of an airplane's, gives the operator a sense of launching the torpedo over the surface of the water at a tremendous speed or of subsiding to a snail's pace in order to make a hit below the water line.

The tests produced amazing results. Several old vessels were towed out to sea and a torpedo launched many miles away from them. In every case, and there were 11 tests of the sort, the direct hit was scored by the operator who was able to guide the torpedo to within a foot of the spot aimed at.

The torpedo contains a new and dead explosive of such strength that several of the target ships were cut in half.

The Weymouth mishap occurred when the control instrument burst a tube and left the operator able to guide the torpedo in one direction only. Hence the projectile "made ever widening circles until it was grounded."

"The explosion of the torpedo head was caused by the contact of four detonators, two on the head and two on each side. The explosion occurs immediately when any one of these come in contact with hard objects."

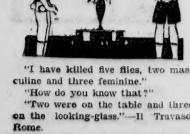

The Explanation
On this day the torpedoes had been far from living up to its reputation. First it would go forward fifty yards or so, then back, then stand still, putting uncertainly, and then begin the same thing all over again. At last one of the travelers lost his patience and summoned the porter.

"What's the matter with this train?" he exploded. "Backing up and jerking forward in this awful way."

"It's quite all right, sir," the porter assured him in that soothing way that porters have. "I think the engineer is teaching his wife to drive."

"Do you see that man through the window?" he hasn't moved for twenty-four hours. He can't be asleep; he must be dead. I am going to call the police."

"Oh, it's all right. There's a chess tournament going on in there."

"I have killed five flies, two masculine and three feminine."

"How do you know that?"

"Two were on the table and three on the looking-glass."—*Il Travaso, Rome.*

W. N. U. 1785

Make Milling Test

Garnet Wheat Found To Be Inferior To Marquis For High Grade Flour

In colors, value of loaf and gluten content, Garnet wheat is inferior to Marquis, though the two varieties show no appreciable differences in absorption and bread yield, according to the result of a test further confirms our previous convictions.

To stage the experiment, which gave results in accord with previous tests, a mix of 2,000 bushels of Garnet wheat was milled in comparison with Marquis on a commercial basis. "An excellent sample of Garnet was used in the test, weighing 65½ pounds per bushel, and averaging 12.5 per cent. protein; the Marquis sample weighed 62½ pounds per bushel and averaged 13.2 per cent. protein."

Regarding bread making, the company's test states, that the variety is consistently from one to two per cent. higher in protein than Marquis and equal to Marquis in all the best baking points. Hope was expressed in the report on agronomic success in producing bread might in the near future enable it to replace all other varieties.

Jack
This year's champion cattle raiser in British Columbia is little Annie Turner, twelve-year-old daughter of James Turner, Cashan, B.C. She is a breeder. Her 14-month-old Short-horn steer, sired by Brakhill Marquis and weighing around 1,100 pounds, won the grand championship of all breeds at the Kamloops bull sale and fat stock show.

But winning trophies for live stock is no novelty for Annie Turner. She won high honors last year and this year also repeated her triumph with cups and other trophies before.

Must Be Perfect

The optical glass used in an astronomical telescope must be free from imperfections and internal strains. In the polishing operation, the maker is so careful that he removes only a few ten-thousandths parts of an inch of glass are removed. Errors of a millionth of an inch in the surface curve must be detected and remedied.

Prince Albert National Park

Princess Alice National Park, in northern Saskatchewan, has an elevation of 1,800 feet above sea level and contains many lakes and streams which form the beginning of canoe routes leading both to Hudson Bay and to the Arctic Ocean.

Canada has no leisure class. Those who have no business to attend to are busy at busiess in the winter and at golf in the summer. Those out of work keep busy watching the sky-scrapers arise.

ONE-PIECE WRAP AROUND

It's one-piece! The smart printed silk crepe wrap around model with effective shirring and drape at right side, so suitable for street and all occasions wear. Its extremely slender lines makes it so suitable for average full figure. The shirring is repeated at shoulders, long sleeves and down flared cuffs. A narrow belt of black and extends to each side of front. Style No. 469 can be had in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. In the Spring size, 27½ yards of 40-inch material with ½ yard of 40-inch contrasting, is sufficient. Plain silk crepe, canton-fabric crepe, crepe Roma, wool crepe, velveteen, cotton fail and printed rajah silk are fashionable fabrics suitable. Pattern price one cent, stamps or coin (coin is preferred). Wear coin carefully when you send for this pattern, you enclose 10 cents additional for a copy of our Spring Fashion Magazine. It's just issued with the delightful styles including smart ensembles, and cute designs for the kiddies.

Fighting Dealers In Narcotics

Addicts In Egypt Spend \$25,000,000 Annually On Drugs

The extent to which the drug traffic is ravaging Egypt may be gathered from a statement by Colonel Russell Pasha, English head of the narcotics bureau recently established.

He declares that the number of Egyptians who habitually take drugs is estimated at more than 500,000 in a population of 10,000,000 including Syrians and considers that \$25,000,000 is spent annually on the purchase of narcotics.

The bureau is engaged in a stern fight against the dealers in narcotics. One member of the gang recently tracked down in Vienna is reported to have netted \$80,000 during the last two years from the drug traffic.

Three Years Making Table

Ohio Man Used 1,537 Pieces Of Wood But No Nails

Three years of tireless effort have made Hiram W. Blair, Marion, Ohio, the possessor of a library table that is considered a work of art.

Without the use of a single nail or screw, Blair has constructed a table that many antique collectors would like to own.

The top is constructed of 1,537 pieces of wood, 37 different kinds being used to give the desired color effect.

Attractive in its simplicity, the unique table contains but three designs, the Masonic square and compass, composed of 62 pieces of wood, and the American legion emblem.

Blair is a World War veteran. He began work on his table October 5, 1925.

Strong For Daylight Saving

Twenty-Five Million In States With The Order This Summer

The Merchants' Association of New York announced recently it had completed a survey showing that 25,000,000 persons in the United States will live under daylight saving time this summer.

While a few of the smaller cities and towns have discarded the practice since last survey was made two years ago, the association said the latest inquiry shows the movement on the whole is growing.

A bill authorizing daylight saving is now pending in California; Massachusetts has a statewide daylight saving law; the whole state of Rhode Island will be on daylight saving by the end of numerous local ordinances, and virtually the entire state of New Jersey will observe the new time.

In New York State 136 cities and towns have set clocks ahead, and six communities in Connecticut will again adopt the plan. Chicago and eight other cities in Illinois and six cities in Indiana are among other places to adopt the scheme.

Canadian Ice Cream

For South Americans

Shipment Goes Forward To Georgetown, British Guiana, By C.N.

The first shipment of ice cream, which it is believed was ever made to South America from any place in Canada, went forward recently from Toronto, N.S., consigned to Georgetown, British Guiana, by the R.N.S. "Lady Drake" of the Canadian National Steamship.

The first shipment of ice cream, which it is believed was ever made to South America from any place in Canada, went forward recently from Toronto, N.S., consigned to Georgetown, British Guiana, by the R.N.S. "Lady Drake" of the Canadian National Steamship. The order, which is of substantial size, was received by the manufacturer entirely unsolicited, and the manager of the firm foresees great possibilities in this trade with the inauguration of the new service by the Canadian National Steamships.

Two years ago they made their first shipment of this delicacy out of Canada to Newfoundland, and this year since development in the regular trade. Convinced by their success in Newfoundland, the firm decided to extend the export field with the results as noted.

Decline Of Chivalry

Knighthood Appears To Be No Longer In Favor

It was bound to come. Woman, having overdone of male dignity, insisting that complete equality between the sexes should be demonstrated beyond dispute, now laments the absence of qualities of which she has deprived the sterner sex in the process of the campaign.

Two years ago they made their first shipment of this delicacy out of Canada to Newfoundland, and this year since development in the regular trade. Convinced by their success in Newfoundland, the firm decided to extend the export field with the results as noted.

Area Under Irrigation In Alberta

In southern Alberta there are now ten large irrigation projects in operation comprising an area of slightly more than one million acres susceptible of irrigation from the 5,000 miles of canals and ditches already constructed.

Loggers Great Egg Eaters

Not Unusual For One To Eat Half Dozen For Breakfast

Poultry producers in British Columbia have been giving more attention than usual, of late, to the local market afforded by logging camps. Logging camps attract a profitable special market for a number of individual products. Loggers, as a whole, are great egg consumers. Poultryman has just compiled a list of logger consumers, which is surprising, totaling 3,200 men. Loggers are served with eggs without stint for breakfast. It is not unusual for one logger to eat half a dozen eggs as a starter for the day.

Must Have Fire Brigade

Some anti-bills have their own fire brigades. A woman naturalist in France discovered this by placing a lighted taper on a hill. A battalion of ant firemen promptly appeared and extinguished it by squirting liquid formic acid from their jaws on the taper, while others tore at it. Many of the ants were of the kind to one hero dragged another from danger.

Mrs. Dull—The cake recipe Mrs. Smith gave me is too expensive to use. The eggs cost too much.

Mrs. Dull—How many does it cost?

Mrs. Dull—Eighteen; the yolks of nine and the whites of nine.

Father: "It's late; hasn't your young man closed the door yet?"

Daughter: "Yes Daddy."

Father: "From the outside?"

Canada Makes Great Strides In Past Few Years In Work Of Aerial Mapping

Care At Shearing

Time Well Repaid

Clean Floor and Neat Belling Of Fleeces Are Essential

With wool providing a very important proportion of the total revenue from sheep and with the product sold on a graded basis as it is in Canada, it is important to exercise care at shearing time, point out officials of the Canadian Co-operative Wool Growers.

Nowadays, time is not taken for any mere scenic record, although they would be well worth while for that alone, said Mr. Stewart. "The maps are used for tracing, mineral deposits, oil and timber resources, locating transportation routes, range boundaries, and for many other purposes is giving Canada the best opportunity she has ever had of studying herself and finding out just how valuable her resources really are."

Aerial mapping is a comparatively recent development in Canada, although in the last two or three years amazingly long strides have been made. In 1921, for instance, only 280 miles were mapped, while last year the Government's aerial survey has tallied 66,000 square miles.

Last year the Royal Canadian Air Force made 1,000 photographs from the air under direction from the topographical survey department.

There are two methods of aerial mapping, the one being the old-fashioned. The former method covers territory much quicker than the latter, and is practicable in flat country, but in British Columbia it will be necessary to use the vertical method.

While the accurate production of maps from aerial photography calls for a good deal of ground control in co-operation with aerial work, the aerial pictures are an excellent means of making quick maps of new territory, a frequent demand in these days of rapid mineral and timber development, according to Mr. Stewart. He states the new aerial maps of Northern Ontario and Manitoba in British Columbia, recently obtained in this way that would take years of ground work. On some of the Ontario maps, thousands of lakes have been mapped that never appeared on the records before the air pictures were made.

In the next ten years Canadian officials expect to have a million pictures of Canadian territory, according to Mr. Stewart. One-quarter of that number have already been obtained.

Canada Must Improve Barley

Professor Harrison Finds Most In Europe Only Take Best Quality

Prof. T. J. Harrison, Manitoba Agricultural College, and Paul Breckenridge, returned recently from Europe, where they have been making investigations on the barley requirements of the British and foreign trade. Professor Harrison is making his plans for encouraging better quality. There is a market there for Canada's O.A.C.-21 in the distilling and malt extract trade, but not for brewing. With such quantities of excellent barley the European markets have plenty of opportunity to skim the tops, and it is only the best they want.

Beggar (to lady of house): "Madam, I'm not asking you for food or shelter; I'm asking you for work."

Lady: "What do you want, then?"

Beggar: "You don't happen to have an old tire for my car, do you?"

Cashium Produced In Canada

Canada has been producing cashium for some time in 1925. It is used for plating purposes, in colour making, medicine, and dyeing.

Not Unusual For One To Eat Half Dozen For Breakfast

Poultry producers in British Columbia have been giving more attention than usual, of late, to the local market afforded by logging camps. Logging camps attract a profitable special market for a number of individual products. Loggers, as a whole, are great egg consumers. Mrs. Dull—Eighteen; the yolks of nine and the whites of nine.

Father: "It's late; hasn't your young man closed the door yet?"

Daughter: "Yes Daddy."

Father: "From the outside?"

Canada is taking pictures of herself from the air at the rate of some 66,000 square miles a year. In other words, Canadian flyers are adding to the aerial maps of this country an area equal to two-thirds of the area of Britain and Ireland every year, according to N. C. Stewart, Victoria surveyor who has recently returned from Ottawa after studying aerial mapping and general developments along this line.

"The maps are not taken for any mere scenic record, although they would be well worth while for that alone," said Mr. Stewart. "The maps are used for tracing, mineral deposits, oil and timber resources, locating transportation routes, range boundaries, and for many other purposes is giving Canada the best opportunity she has ever had of studying herself and finding out just how valuable her resources really are."

Aerial mapping is a comparatively recent development in Canada, although in the last two or three years amazingly long strides have been made. In 1921, for instance, only 280 miles were mapped, while last year the Government's aerial survey has tallied 66,000 square miles.

Maritime Provinces,
Oceania Tour.

IN arranging low fares for prairie residents, we regard this part of public service... always ready with their equipment plus the experience which enables us to care for any movement with smoothness and efficiency.

THIS summer—escape for a little while from the dull sameness of succeeding days. Our low fares from May 15 to Sept. 30 (with a final return limit Oct. 31, 1929) make it easy.

OUR trains pass through a territory replete with scenic grandeur, of historical and educational value to the traveller. Nothing superior to our sleeping and dining car service... Radio, an added feature on through trains.

THINK IT OVER

Whatever vacation section you have in mind, our local agent will be pleased to give every assistance. He will be glad to quote lowest fares and make all arrangements for you—or write J. MADILL, District Passenger Agent, Edmonton

CANADIAN NATIONAL

About Town and Country

Alex. R. McTavish, R.O. Sight Specialist of Drumheller, will make his regular monthly visit to the Hotel, Oyen, on Thursday, May 23. Dependable scientific eye examination. Glasses fitted, repairs. Prices very reasonable.

The Ladies Aid will hold a sale of home cooking, candy and afternoon tea in the United Church, Oyen, on Saturday, May 18, from 2 p.m. till 5 p.m.

Lost—On Saturday night, a leather lined mackinaw, somewhere between Haven and Oyen. Finder please leave same at S. A. Miller's.

Mr. Eric Sharp of Seafield and Mr. Gordon Caswell of Oyen, motored to Esther last Sunday to visit Mr. A. Rowe, former assistant at the pool elevator here.

Mr. and Mrs. S. A. Miller and son Bert, left last Sunday morning en route to Ontario, where they will visit relatives.

Mrs. Harry Hunter of Sibbald was an Oyen visitor yesterday.

Mr. R. White of Edmonton, Alta., is a town visitor to-day.

The Alsask high school girls' basketball team will be Oyen visitors next Saturday, when they meet the local high school girls in a return game. The boys' baseball team will also be visitors on the same day to play the local school boys.

Watch your address label.

Grain Commission to Hold Alberta Sittings

The Royal Saskatchewan Grain Inquiry Commission which has been holding sessions in that province and at the Pacific coast will sit at a number of points in Alberta during the next month. Evidence will be taken by the commission at Edmonton, May 20 to 24; Camrose, May 27-28; Stettler, May 29-30; Calgary, June 3 to 7; Claresholm, June 10-11; Lethbridge, June 12-13 and Medicine Hat, June 14-15.

New Pool Etc.

Between March 22 and May 6, this year the Alberta Wheat Pool has purchased 22 local elevators and has 41 new elevators under construction. The new elevators being built are 35,000 and 40,000 bushels capacity, and the majority of those purchased are of 30,000 bushels capacity. The addition of these houses brings the total elevators owned by the Alberta Pool to 381.

Elevators have been purchased at the following points: Achsone; Bardo; Bassano; Boyle; Cavendish; Chigssel; Coutts; Haynes; Hazelton; Lacombe; Louisiana; Midnapore; Oberlin; Orion; Sabine; Spring Coulee; Spruce Grove; Stobart; Warpsite; Whitelaw; Whittia; Villeneuve.

Elevators are being built at the following points: Alex; Athabasca; Balzac; Barnwell; Benet; Bittern Lake; Brooks; Broxburn; Buoyant; Clandon; Coldhurst; Colinton; Courich; Cowley; Charbonneau; Delacour; Diamond City; Dinadale; Dinant; Grainger; Grantham; Hay Lakes; Indus; Langley; Lea Hurst; Lyalta; Mirror; Morrisville; Nova; Panoce; Pi-broch; Raley; River Bend; Rosebud; Rosemary; St. Albert; Strangmuir; Two Hills; Waskatonau; Weiss; Vimy.

During June and July, Wednesdays half-holiday will be observed by the business men of Oyen. Stores will close at 1 o'clock p.m.

Statistics compiled by the Fisheries Branch of the Department of Marine and Fisheries, show that more than 85,000 persons were employed in the Canadian fishing industry during the last year.

Canada's fish and fish products account annually for upwards of \$40,000,000 of the Dominion's export trade totals.

Oil Production Sets New Record

Establishing a new high mark in the history of the province, oil production delivered to the refineries from wells in the Turner Valley field during the month of April reached a total of 49,307 barrels. This production shows an increase of 12,500 barrels over that of the preceding month, the gain being largely contributed by an increased flow from Home No. 1, Royall No. 8, Dalhousie No. 1 and Oakalta No. 1 wells.

Announcement

I wish to inform the ladies of Oyen and district that I have moved my beauty parlor to the premises of Dr. T. F. Holt, dentist, Main St. Oyen, (next door to Telephone exchange) and am now ready for business.

Oyen Beauty Parlor
(Lena Hannauich)

Reorganization Meeting of School Fairs Board

A re-organization meeting of Oyen district school fairs board will be held in the council chambers, Oyen, on Friday evening, this week. All members of last year's executive and those interested are asked to be present. The meeting will be called to order at 8 o'clock.

"Wild Geese" Attracts

Large Crowd

"Wild Geese" the motion picture adapted from the prize winning story by Martha Ostenso, shown in Oyen Theatre last Wednesday, under the auspices of the ladies aid, was attended by a record crowd, the theatre being taxed to capacity, and a number who came late were unable to gain admission.

As a result of the venture the ladies aid cleared a sum of approximately \$225 after paying all expenses.
